

MONOGRAM 42" BUILT-IN COLUMNS RETROFIT

STANDARD INSTALLATION

The refrigerator will project forward, slightly beyond adjacent cabinetry.

HELPFUL TIPS

- A minimum 3 1/2" (8.9) finished return matching cabinet exterior recommended on interior on all sides and top at front of opening

• In a side-by-side installation of a left-and-right-hand door swing product, minimum 1/2" clearance between the units is required. Also required is Side-by-Side Heater/Dual Installation Kit, ZKUN, 42" trim kit, ZKR42N and 42" stainless toe kick ZKK42P.

For retro fit installations, both units can be plugged into the same electrical supply receptacle.

ATTENTION ELECTRICIAN:

A 115 volt 60Hz., 15 or 20 amp supply is recommended for each product. An individual properly grounded branch circuit or circuit breaker is recommended. Install a properly grounded 3-prong electrical receptacle recessed into the back wall. Electrical must be located on rear wall as shown.

WARNING:

When installing appliance, you must use and follow the product installation instructions. These can be found with unit or on web at monogram.com.

This document is intended for cabinet and panel construction only.
