

READ AND SAVE THESE INSTRUCTIONS

! FOR DOMESTIC COOKING ONLY !

WARNING

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS, OBSERVE THE FOLLOWING:

1. Use this unit only in the manner intended by the manufacturer. If you have questions, contact the manufacturer or your distributor.
2. Before servicing or cleaning unit, switch power off at service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.
3. Installation work and electrical wiring must be done by a qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction codes and standards.
4. Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent backdrafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.
5. When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
6. Ducted fans must always be vented to the outdoors.
7. To reduce the risk of fire, use only steel ductwork.
8. If this unit is to be installed over a tub or shower, it must be marked as appropriate for the application and be connected to a GFCI (Ground Fault Interrupter) - protected branch circuit.
9. Never place a switch where it can be reached from a tub or shower.
10. This unit must be grounded.

TO REDUCE THE RISK OF A RANGE TOP GREASE FIRE:

1. Never leave surface units unattended at high settings. Boilovers cause smoking and greasy spillovers that may ignite. Heat oils slowly on low or medium settings.
2. Always turn hood ON when cooking at high heat or when flambéing food (i.e. Crepes Suzette, Cherries Jubilee, Peppercorn Beef Flambe').
3. Clean ventilating fans frequently. Grease should not be allowed to accumulate on fan or filter.
4. Use proper pan size. Always use cookware appropriate for the size of the surface element.

TO REDUCE THE RISK OF INJURY TO PERSONS IN THE EVENT OF A RANGE TOP GREASE FIRE, OBSERVE THE FOLLOWING:*

1. SMOTHER FLAMES with a close-fitting lid, cookie sheet, or metal tray, then turn off the burner. BE CAREFUL TO PREVENT BURNS. If the flames do not go out immediately, EVACUATE AND CALL THE FIRE DEPARTMENT.
2. NEVER PICK UP A FLAMING PAN - You may be burned.
3. DO NOT USE WATER, including wet dishcloths or towels - violent steam explosion will result.

WARNING

4. Use an extinguisher ONLY if:

- A. You know you have a Class ABC extinguisher and you already know how to operate it.
- B. The fire is small and contained in the area where it started.
- C. The fire department is being called.
- D. You can fight the fire with your back to an exit.

* Based on "Kitchen Fire Safety Tips" published by NFPA.

CAUTION

1. For general ventilating use only. Do not use to exhaust hazardous or explosive materials and vapors.
2. To avoid motor bearing damage and noisy and/or unbalanced impellers, keep drywall spray, construction dust, etc. off power unit.
3. **If ventilator is installed in an unconditioned space (such as an attic):** Surround the ventilator with thermal insulation - to minimize possible condensation.
4. Please read specification label on product for further information and requirements.

TABLE OF CONTENTS

This manual is divided into sections as follows:

- "TYPICAL INSTALLATION"
This section shows a common installation.
 - Mounting (New Frame Construction)
 - Mounting (Existing Frame Construction)
 - Mounting Using Hanger Kit (included)
 - Ducting (Horizontal blower discharge)
 - Wiring
- "MOUNTING OPTIONS"
- "WIRING PLATE POSITION"
- "DUCTING OPTIONS"
 - Blower Discharge Positions
 - Ducting (Vertical blower discharge)
- "ATTACH POWER CORD TO HOOD"
- "USE AND CARE"

Installer: Leave this manual with the homeowner.

Homeowner: Use and Care information on page 4.

TYPICAL INSTALLATION

MOUNTING (New Frame Construction)

Factory-shipped unit installed in new construction.

MOUNTING (Existing Frame Construction)

Blower factory-shipped in straight-through discharge position.

TYPICAL INSTALLATION

MOUNTING USING HANGER KIT (included)

Blower factory-shipped in straight-through discharge position.

DUCTING (Horizontal blower discharge)

Two ways to connect ductwork to a factory-shipped unit.

IMPORTANT: Remove shipping tape from damper
Remove the shipping tape from the damper flap and make sure that damper flap opens and closes freely inside the ductwork. Use duct tape to make ductwork connections secure and air-tight.

WIRING

Ventilator can be wired from outside of housing.
Use UL approved connectors to wire per local codes.

MOUNTING OPTIONS

1/4-20 hex nuts secure mounting brackets to housing. Loosen and re-tighten or remove and replace nuts as necessary for desired mounting bracket position.

Mounting brackets in
factory-shipped position.
(Outlet parallel to joists.)
(New construction)

Mounting brackets flipped
over and mounted to outlet
sides of housing.
(Outlet parallel to joists.)
(Existing construction)

Mounting brackets mounted
to outlet sides of housing.
(Outlet perpendicular to joists.)
(New construction)

Mounting brackets flipped
over to give approx. 1\"/>

Mounting brackets mounted
to top of sides of housing.
(Outlet parallel to joists.)
(New or existing construction)

Mounting brackets flipped
over and mounted to top of
sides of housing.
(Outlet parallel to joists.)
(New or existing construction)

WIRING PLATE POSITION

Wiring plate mounts to side or top of housing.

DUCTING OPTIONS

BLOWER DISCHARGE POSITIONS

Blower and duct connector in horizontal discharge
position. (Factory shipped)

Blower and duct connector in vertical discharge
position.

DUCTING (Vertical blower discharge)

Typical ductwork connection to a ventilator converted to
vertical discharge.

ATTACH POWER CORD TO HOOD

Follow wiring instructions packed with range hood, and adhere to all local and state codes, and the National Electrical Code.

WARNING: To reduce the risk of electric shock, disconnect from power supply before servicing.

Some hoods require the use of a separate power cord and strain relief bushing (included), for proper wiring of in-line blowers. Please refer to the hood manual for proper installation instructions.

USE AND CARE

To clean blower assembly: Remove access panel, unplug blower from housing, remove blower mounting nuts, and carefully remove blower from housing. Use appropriate vacuum attachment or a soft cloth and mild soap or detergent to clean blower discharge area and wheel. **DO NOT ALLOW WATER TO ENTER MOTOR.** Make sure blower assembly is completely dry before reinstalling.

Motor is permanently lubricated. Do not oil or disassemble motor.

Installer: Leave this manual with the homeowner.

Homeowner: Use and Care information on page 4.

TYPICAL INSTALLATION

MOUNTING (*New Frame Construction*)

Factory-shipped unit installed in *new* construction.

MOUNTING (*Existing Frame Construction*)

Factory-shipped unit installed in *existing* construction.

TYPICAL INSTALLATION

MOUNTING USING HANGER KIT (included)

Blower factory-shipped in straight-through discharge position.

DUCTING (*Horizontal blower discharge*)

Two ways to connect ductwork to a factory-shipped unit.

IMPORTANT: Remove shipping tape from damper
Remove the shipping tape from the damper flap and make sure that damper flap opens and closes freely inside the ductwork. Use duct tape to make ductwork connections secure and air-tight.

WIRING

Ventilator can be wired from outside of housing.
Use UL approved connectors to wire per local codes.

MOUNTING OPTIONS

¼-20 hex nuts secure mounting brackets to housing. Loosen and re-tighten or remove and replace nuts as necessary for desired mounting bracket position.

Mounting brackets in factory-shipped position - mounted directly to joists. (Outlet parallel to joists.) (New construction)

Mounting brackets flipped over and mounted to additional framing. (Outlet perpendicular to joists.) (New or Existing construction)

Mounting brackets flipped over and mounted to additional framing. (Outlet vertical.) (New or Existing construction)

Mounting brackets flipped over and mounted to top of housing. Housing secured with cables. (Outlet parallel to joists.) (New or Existing construction)

WIRING PLATE POSITION

Wiring plate mounts to side or top of housing.

DUCTING OPTIONS

BLOWER DISCHARGE POSITIONS

Ventilator shown in straight-through discharge position. (Factory shipped)

Ventilator shown in right-angle discharge position. (Change movable panel to new location as shown.)

DUCTING (Vertical blower discharge)

Typical ductwork connection to a ventilator converted to right-angle discharge.

ATTACH POWER CORD TO HOOD

Follow wiring instructions packed with range hood, and adhere to all local and state codes, and the National Electrical Code.

WARNING: To reduce the risk of electric shock, disconnect from power supply before servicing.

Some hoods require the use of a separate power cord and strain relief bushing (included), for proper wiring of in-line blowers. Please refer to the hood manual for proper installation instructions.

USE AND CARE

To clean blower assembly: Remove access panel, unplug blower from housing, remove blower mounting nuts, and carefully remove blower from housing. Use appropriate vacuum attachment or a soft cloth and mild soap or detergent to clean blower discharge area and wheel. **DO NOT ALLOW WATER TO ENTER MOTOR.** Make sure blower assembly is completely dry before reinstalling.

Motor is permanently lubricated. Do not oil or disassemble motor.
